SUMMARY

Proactive and results-driven Artificial Intelligence and Data Science Engineer with a strong foundation in the complete Machine Learning model lifecycle (MDLC), from data processing and model creation to training and assessment. Specialized in developing Generative AI and NLP solutions using Python, TensorFlow, PyTorch, and Scikit-learn. Proven ability to build and deploy intelligent applications, demonstrated through hands-on projects involving LLMs, speech recognition, and predictive modeling. Eager to leverage skills in GenAI, MLOps, and cloud technologies like GCP to build intelligent test automation and anomaly detection systems.

EXPERIENCE

Founder – Final Edge Technologies	08/25 - Present
Built and managed AI and software projects end-to-end, Worked on Python, AI/ML, cloud, and API-based systems, Led planning, development, and documentation	
Operations Intern – Sparktales Learning Solutions Pvt Ltd	11/25 – 02/26
Worked on web-based development and operational tasks, Hands-on exposure to AWS, Azure AI, GenAI, FastAPI, RAG, Supported documentation, reporting, and project coordination, Collaborated with team members in a professional environment	
Python & Machine Learning Trainee at JM Consultancy	06/25 – 07/25
Acquired hands-on experience in advanced Python programming, including OOP, file handling, and error handling. Applied machine learning concepts to build mini projects, strengthening foundational ML skills.	

EDUCATION

BACHELOR OF TECHNOLOGY IN ARTIFICIAL INTELLIGENCE AND DATA SCIENCE	2022 – 2026
SIR ISSAC NEWTON COLLEGE OF ENGINEERING AND TECHNOLOGY NAGAPATTINAM, TAMIL NADU	
HIGHER SECONDARY EDUCATION	2020 - 2022
GOVERNMENT HIGHER SECONDARY SCHOOL POONTHOTTAM, THIRUVARUR, TAMIL NADU	

PROJECTS

Smart ATS resume analyzer & builder
Engineered an NLP-powered web tool to help job seekers create ATS-friendly resumes and evaluate them against job descriptions. Implemented cosine similarity, keyword extraction, and scoring algorithms using Python, Flask, and NLTK to analyze content and provide real-time optimization suggestions. Improved resume–job match accuracy by over 85%, increasing shortlisting potential.
Gate entry system
Designed a secure gate-access management system to automate visitor verification and entry logging. Built a web-based application with Flask, Python, and SQLite to capture visitor details, generate unique QR codes, and maintain real-time entry/exit records. Enhanced campus security and reduced manual check-in time by over 70%.
Data Leakage Checker System
Developed a dataset intelligence system that detects data leakage and preprocessing issues before model training. Includes automated profiling, leakage alerts, preprocessing pipelines, and interactive visual insights to support trustworthy ML workflows.
AI Career Coach Chatbot
Designed and implemented an AI-powered chatbot that provides personalized career guidance using NLP and large language models. Integrated conversational AI with structured guidance flows to assist users in interview prep, resume tips, and career planning.

TECHNICAL SKILLS

Programming languages:	python, java, SQL, dart, C++
Web development:	React, html, CSS, WordPress, flask, fastApi, restApi, Django, Flutter
Data science & machine learning:	Scikit-learn, XGBoost, TensorFlow, Keras, PyTorch, NLTK, OpenCV, LLMs
Data Visualization & Analytics:	Tableau, Power BI, Matplotlib, Seaborn, Excel
Ai Automation tools:	n8n, Zapier, UiPath
Developer Tools & Version Control:	Git, Jupyter Notebook, PowerShell

CERTIFICATES

- **BCG – GenAI Job Simulation (Forage)** — Issued Jun 2025, Credential ID: mx4NjtLsxoyTwysaE
- **Tata Group – GenAI Powered Data Analytics Job Simulation (Forage)** — Issued Jun 2025, Credential ID: toX97ZvWmxXP8Zbic
- **The Fledgling (Infosys)** — Issued Mar 2025, Credential ID: 836IW54LX3

ACHIEVEMENTS

Rotary Youth Leadership Awards (RYLA) – Recognized for leadership development, communication skills, teamwork, and professional networking (Dec 2023).

HOBBIES

- Daily one program
- Open-source contributions
- Blogging on tech/AI trends
